Personal Profile

Motivated and detail-oriented First Class graduate of Kings College London, with a BSc in Computer Science and Management with a Year in Industry, currently pursuing a masters for AI innovations and Applications at Imperial . Highly passionate about software development, engineering, and cybersecurity. Proficient in Java, Python, and C++, with continued self-directed learning in AI and advanced programming apart from the degree.

Effective communicator and team player with proven leadership across technical, academic, and extracurricular projects.

Education:

Imperial 2025 -Current:

Ai innovations and applications

King's College London 2021 -2025:

Computer science and management with a year in industry

Chislehurst and Sidcup Grammar school 2014 -2021:

Computer science Maths Physics Chemistry

Experience:

Technical:

Dissertation: Visualizing Uncertainty 2024 -2025:

Presented and the 2025 kings NMES showcase

- Developed a simulation using non-traditional visualization methods to represent uncertainty in flight data created by company AI.
- Built in C# using Unity.
- Wrote a research paper from analysing sources to creating a hypothesis and using different evaluation techniques to prove the hypothesis.

Python Neural Network Project 2024:

- Designed a flexible neural network library with variable hidden nodes and layers.
- Incorporated K-Nearest Neighbor and Q-learning algorithms.
- Implemented entirely in Python.

Technology Placement – Nomura – 2023 – 2024:

- Supported financial infrastructure under strict SLA deadlines.
- Gained hands-on experience with Linux, AWS, and Snowflake.
- Collaborated across global technical and non-technical teams.
- Authored technical documentation and handover materials.
- created non-invasive toil automation from Internal and external API
- Participated with internal AI hackathon in uses of AI within the company and how to implement the idea.

Business and Teamwork:

Business Development Manager – King's Labs 2024 – 2025:

- Managed relationships with new and existing clients.
- Coordinated mixed-role teams to deliver software projects.
- Worked closely with marketing and development teams.

Student

Consultancy – AquaZoo - 2024

- Researched and compiled analysis of over 1000 zoos.
- Developed a multi staged plan starting from getting 5 clients to running a monopoly.
- Used financial analysis and academic research to back suggestions.

Treasurer – King’s Taekwondo Society – 2022 – 2024:

- Managed and raised a £8,000+ annual budget and society expenses.
- Liaised with sponsors and organized multi-society events.

Outreach Officer – King’s Cyber Security Society – 2022 -2023

- Organized events and collaborated with industry professionals.
- Curated educational content and promoted cybersecurity literacy.

Skills:

Programming Languages:

Java (Intermediate)	Python (Intermediate, with Django)	C++ (Intermediate)
C# (Intermediate)	HTML (Intermediate)	

Technical Skills:

Unity, Git, Linux	Database Design	Software Project Management
Cybersecurity Basics	AWS Basics	Basics of Machine learning

Soft Skills:

Problem Solving	Time Management	Leadership & Teamwork
Cultural Awareness		

Interests and achievements:

Competing in:

Cheerleading, Taekwondo, Hockey

Interested in:

Travel, F1, Hiking

Awards:

Jack Petchey award, NCS, Duke of Edinburgh Silver, Winner of Blockchain Hack
